A&E, Urology & Radiographer KUB/CT KUB/IVU guidance
Signs/symptoms of renal colic (loin-groin pain, suprapubic pain, microscopic haematuria, single sided abdominal pain)
Uncertainty about nature of abdominal pain, and not definitely renal colic
9am-5pm Mon-Fri, 9am-1pm Sat & Sun – CT KUB
Outside of CT KUB times, is pt able to wait until CT KUB times? If not, requires acute IVU
KUB &/or ultrasound as appropriate
Request for post CT KUB. Urologist should first review the CT scout/topogram (the same as viewing a KUB)
Other acute abdominal pathology ruled out
9am-5pm Mon-Fri, 9am-1pm Sat & Sun – CT KUB
Outside of CT KUB times, is pt able to wait until CT KUB times? If not, requires acute IVU
Yes – CT KUB is first line investigation
Discuss with CT department Mon-Fri, Discuss with on-call Radiologist Sat & Sun
