

Video Consultation - SystemOne setup

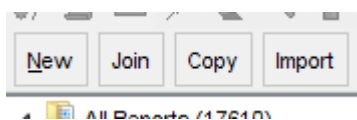

Clinical Report

A Clinical Report is required that looks for the appropriate read code in the patient records – Y053e Required Video Telephony

Go to the Reporting menu > Clinical Reporting

Create a new report

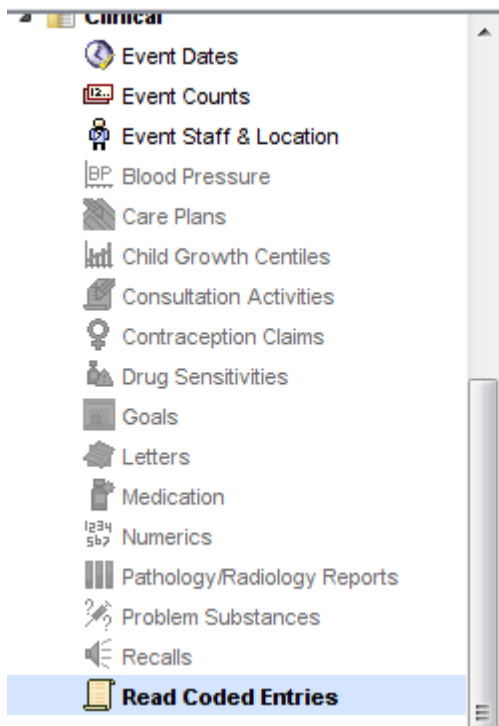

The “New Report” window appears

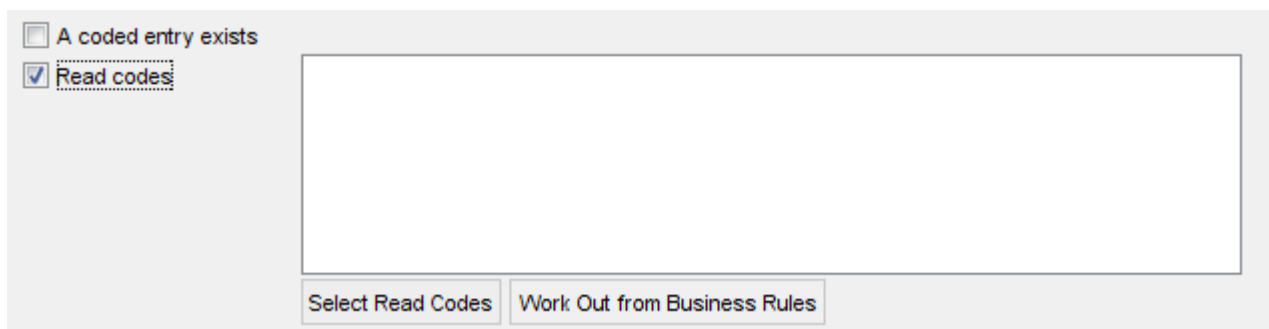

Give the new report a meaningful name – such as “Video Consultation Patient Status Alert” and store it in an appropriate category.

Name	Video Consultation Patient Status Alert	<input type="checkbox"/> Add report to favourites
Category	Iain	New Category
Sub category		New Sub-category

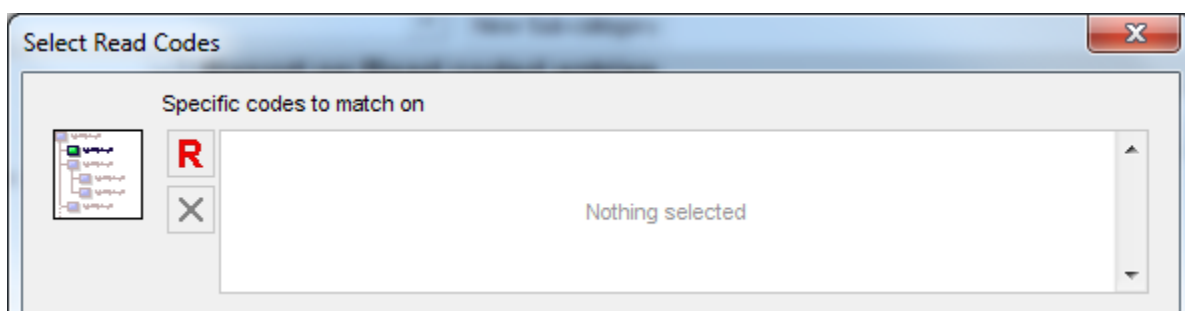

Locate the “Read Coded Entries” section in the list of reporting criteria on the left hand side

Place a tick in the “Read Codes” box on the right hand side and click on the select read codes button

The “Select Read Codes” window appears. Click on the  button under “Specific Codes to Match on”

The Read Code Browser is displayed. Search for the code Y053e – Requires Video Telephony.

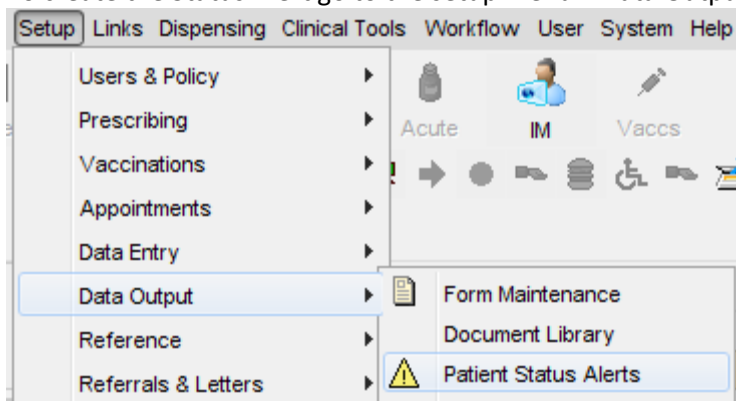

Click OK Read Code Browser window.

Click OK in the Select Read Codes window.

Click OK in the Create Report window.

Set up new Patient Status Alert

To create the Status Alert go to the setup menu > Data Output > Patient Status Alerts

Create a new alert by clicking on the “New Patient status Alert” button

The New Patient Status Alert window appears

Give the alert a meaningful name – such as Video Consultation Patient Status Alert

Store it in an appropriate category

Select an appropriate icon to be displayed

Give a meaningful description of the Alert

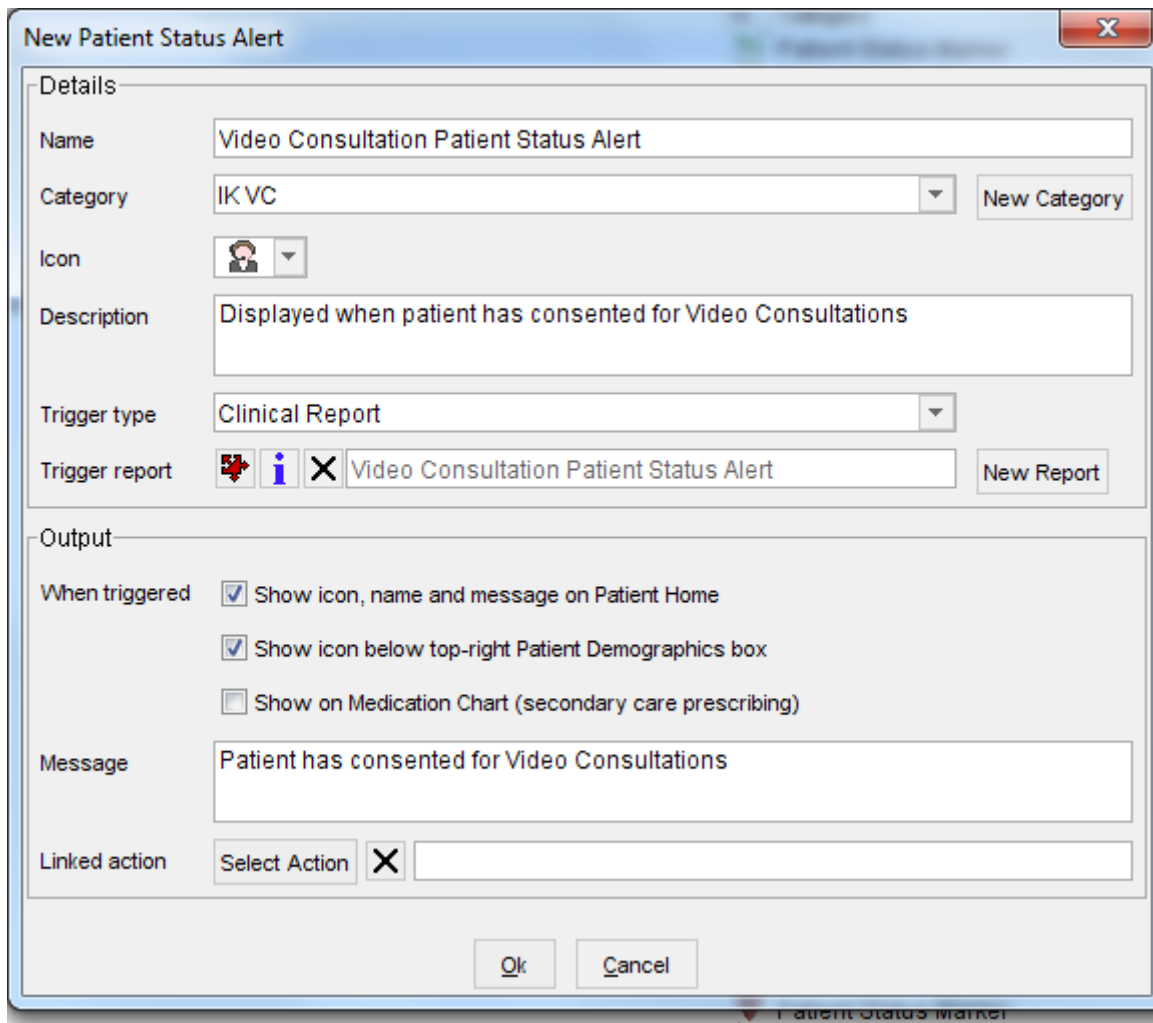

Select “Clinical Report” as the trigger type

Click on the  icon next to Trigger Report to select the report created in the previous steps of this document

Place ticks in the “show icon, name and message on patient home” and “show icon below Patient Demographics box”

Type an appropriate message that will be displayed when the icon is hovered over in the patient record

Click OK to close the New Patient Status Alert window
